Heavy Duty Soldering Iron DE LUX 90

new

+1400°C

90 year anniversary edition

The ANNIVERSARY EDITION „DE LUX 90“ is bright chromium plated and plant-equipped with a maintenance-free ZINNLUX-LONGLIFE soldering bit and an attached set-up stand. This elegant soldering device makes every craftsman's heart beat faster and is not only designed for the looks. The soldering iron **DE LUX 90** is well-engineered technology combined with resilient quality and elegant design.

ZINNLUX-LONGLIFE soldering irons are covered with a special coating to protect the copper core from aggressive soldering fluid and deposits on the surface. No retouching by filing or hammering is required for a length of 2500 meters!

The PERKEO heavy-duty soldering iron **DE LUX 90** is a technically sophisticated quality product that is made only from the finest materials such as stainless steel, solid brass and teflon. Exceptionally heavy duty, low maintenance and easy to operate, it is ideal for everyday use. And it goes on working well despite moisture, solder chemicals or the toughest jobs. You can work with the PERKEO's powerful and constant flame even in strong winds and without using a windbreak.

PERKEO heavy-duty propane soldering iron

- Fast ignition without using an air slider.
- Reliable action, perfect handling.
- Handy control wheel to provide the exact amount of gas. The flame responds instantly.
- Ergonomically designed handle made of hard wood (common beech), very well insulated.
- Rotatable tube connection, for either M10x1 or G 3/8" LH.
- Valve gasket made of indestructible teflon.
- Back cap and valve rod made of stainless steel.
- All individual parts available as spares.
- Easily adaptable with its versatile accessories.
- Especially durable 350g ZINNLUX-LONGLIFE-soldering bits also available in point or hammer form.

Specifications

- Gas consumption at 1.5 bar: 130g/h
- Output 6026KJ/h
1.67KW

The soldering iron described here works with mid-pressure propane at an ideal operating pressure of 1.5 bar. Performance is enhanced by increasing the pressure up to a maximum of 4 bar.
